

Effect of lifestyle on ω under M4 and M2 models

A

Free-ratio model (M4)

$\omega \sim \text{Condition} + (1 \mid \text{TaxonPair}) + (1 \mid \text{SOG}), p = 0.0827$

Lifestyle  Lichen-forming  Free-living

B

Two-ratio model (M2)

$\omega \sim \text{Condition} + (1 \mid \text{SOG}), p = 8.36e-46$
